- No Long Term Commitment

How it Works

Rx101 is designed to educate you on the use of generic and other low cost brand name drugs. It is designed to help you find drugs within the same therapeutic class as a drug you may be currently taking, but is less expensive. Most of all, Rx101 is designed to save you money on your prescription drug costs. Call today to see what your savings will be.

\$10⁰⁰
or less
Tier 1: generic drugs that are available for up to a \$10 payment. You may pay less.

\$20⁰⁰

Frequently Asked Questions

Where can I use the Rx101 card?

The Rx101 card is accepted at over 42,000 pharmacies throughout the United States. The network includes pharmacy chains as well as thousands of independent pharmacies throughout the United States. The network includes pharmacy chains as well as thousands of independent pharmacies throughout the country. Pharmacy location information can be obtained by contacting customer services at **877-377-9101**. If a neighborhood pharmacy is not already participating in our network, have them call us at **800-361-4542**. We will send them information about how they can participate in the network so that you can take advantage of the savings as soon as possible.

What if my pharmacy doesn't recognize the card?

Pharmacies may not be familiar with every prescription program in which they participate. If the pharmacist does not recognize your Rx101 card or if you encounter a problem at the pharmacy, DO NOT leave without having the pharmacy call the toll-free number printed on the ID card.

What is a generic drug?

Once a patent on a brand name drug expires, other drug companies may make a generic version of the drug, with the approval of the Food & Drug Administration (FDA). The FDA's standards for quality are the same for all manufacturers. This means the generic drug contains the same active ingredients as the brand name whose patent has expired and that it is safe, potent and effective.

How will I know if there's a generic equivalent?

Simply ask your local pharmacist or call our member service department to find out about generic equivalents for your prescription. Also ask your doctor to prescribe generics whenever possible and appropriate (your new member packet will include helpful materials you can share with your doctor.)

What is the difference between brand name and generic drugs?

The brand name is the trade name under which the product is advertised and sold, and is protected by patents so that it can only be produced by one manufacturer for a predetermined number of years. Once a patent expires, other companies may manufacture a generic equivalent, providing they follow stringent FDA regulations for safety. Generics are essentially

a chemical copy of their brand name equivalents. The color or shape may be different, but the active ingredients must be the same for both.

What is a preferred drug list?

A preferred drug list is a list of recommended prescription medications that is created, reviewed and continually updated by a team of physicians and pharmacists. The preferred drug list contains a wide range of generic and brand name preferred products that have been approved by the FDA. Your doctor can use this list to select medications for your health care needs, while helping you maximize your prescription drug benefit. A medication becomes a preferred drug based on safety and efficacy, then on cost-effectiveness.

What is my average savings on 4th Tier Drugs?

There is no guaranteed percentage savings on every prescription purchase. The price paid depends upon the pharmacy and the type and quantity of drug purchased. Pharmacies, just like other retail stores, compete against each other and may have special prices on some products. When this is the case, we cannot discount the pharmacy's already low price, but a member will receive the advantage of the pharmacy's special pricing. **THE MEMBER ALWAYS RECEIVES THE LOWER OF THE Rx101 CONTRACT PRICE OR THE PHARMACY'S PRICE.**

What if the brand drug I am taking is not discounted?

If you are currently taking a medication that has similar active ingredients or is used to treat the same conditions as the preferred brand drugs on the Rx101 product guide, it will still be discounted. You will pay the Rx101 negotiated price for that drug. To take advantage of the potential program savings on listed preferred drugs, you should ask your pharmacist (where regulations permit) or a doctor to change your medication, where medically appropriate, to a less expensive product listed in the product guide.

How does the mail order program work?

If you are taking maintenance drugs or purchasing diabetic supplies on a regular basis, there may be additional savings by using our mail order program. The pharmacy is staffed with licensed pharmacists to assist you. All orders are filled within 24 hours then express delivered to you. A price list is available on our website.
